

The Spring International Food Festival 2025

With God's help, the Spring International Food Festival was held again this year with great success in the courtyard of St. Nicholas Cathedral in Seoul.

The participation of a large number of people from different ethnic and cultural backgrounds, a wide variety of foods, dips, desserts and cookies from ten countries, exquisite flavors and wonderful spring weather contributed to the success of the festival.

It was truly a great blessing to see people from so many different countries on the church grounds, visiting the church and asking for information about the Orthodox Church

What becomes more and more emphatic each time is the involvement of volunteers in the preparation and implementation of the event. Particularly noticeable is the great help offered by the association of young people under the name "Syndesmos" in most of the process of running the festival.

Our heartfelt thanks and gratitude go to all of them for their wholehearted and selfless contribution. May the Risen Lord grant health and every blessing to the volunteers and their families and may He reward their labour of love "in return".
