## **Prospect of land distribution in Greece to young farmers again broached**

**The president of the Athens Chamber of Commerce and Industry (ACCI), Konstantinos Michalos, this week again submitted a proposal for cooperation, including with the Church of Greece, in the agricultural production sector, following his meeting in Athens with relevant Minister Makis Voridis.**

The proposal by Michalos, who is also president of an association of chambers of commerce in the country, essentially aims for cooperation between the ministry, the Church, chambers and universities in distributing unused land to new farmers for cultivation and exploitation.
