Patriarch of Alexandria & All Africa expresses urgent plea for clean drinking water on the continent

The Pope and Patriarch of Alexandria and All Africa, His Divine Beatitude Theodoros II, again expressed his dire concern over living conditions in several parts of the continent, and especially the lack of clean drinking water.

His Divine Beatitude called on Orthodox clerics and hierarchs in Africa to console and stand by, in solidarity, with the African faithful of their parishes, while boosting efforts to better teach public health guidelines, with an emphasis on clean water.
