Family, the joy of life

Daddy George gathered his family and said:
There is an epidemic named Corona, which is a contagious virus. The state and the Church have taken measures for our benefit. We'll be together at home all this period, making the best of our time to benefit and share useful things together as a family so that we do not fall in void and idleness.

A series of clips that help the family in its life course, which is inseparable from its Christian faith, especially these days.
Texts with drawings on the family and the individual, on love and communication between family members, on how to make the most of your time and avoid emptiness.

Guidelines on following the rules of hygiene, avoiding panic, good use of social media, playing together and having fun, physical exercise at home, sharing household tasks and meals, reading cultural and useful books, as well as the Bible, the lives of the saints, and spiritual books, praying at home, and so many other things.
