Sanitary materiel shipped to ethnic Greek communities in southern Albania

The Attica Regional Government entity, which covers the greater Athens area, has transported a large amount of sanitary materials to ethnic Greek communities in southern Albania, following a request by Greece’s general consul in the city of Gjirokaster, Lambros KaKIsis.

Specifically, some 14,000 masks, 10,000 latex gloves and 600 containers of anti-septic liquid will be distributed to communities in the Gjirokaster, Sarande and Himare regions.
