

## **Greece's digital transformation policy to include digitization of country's Orthodox Christian heritage**

Public debate regarding Greece's digital transformation between 2020 and 2025 was concluded this month, with the initiative describing the strategy and actions to be taken, which include a portion dedicated to the country's Orthodox Christian heritage.

Specifically, the digitization of the Autocephalous Orthodox Church of Greece's cultural legacy, as well as of the very significant Byzantine-era monuments and artifacts of Mount Athos are included in the initiative.
