Metropolis of Boston Camp Medical Care

As the safety and good health of our campers, staff, and families remains the top priority at the Metropolis of Boston Camp, and the dedicated team of medical staff, led by Dr. John Kroger and nurse Despina Stavros, and legal counsel, Mark Rouvalis. These individuals are leading the charge through navigating the various CDC, American Camping Association, and State of NH guidelines for overnight summer camps.

In addition to the mobile laboratory contracted through Jim Keady and On-Site Medical Services, MBC's infirmary received a CLIA Certificate of Waiver to be able to offer both rapid antigen testing and point-of-care molecular NAAT testing for all campers, staff, clergy, and guests. MBC's COVID-19 protocol is currently being highlighted as a model for other camps across the state.
