Repair and Maintenance of the Church of St. Dionysios in Ulsan

The repair and maintenance work on the Church of Saint Dionysios of Aegina in the city of Ulsan, was completed successfully. The damage to the roof of the Church, which resulted in rainwater entering the interior of the Temple that had even begun to cause damage to the Iconography, was completely restored. The exterior of the entire building and the interior of the Office and the Baptistery were also painted.

We thank all those who helped financially or otherwise in the completion of this work, and we ask the Lord, through the intersections of St. Dionysios, to give health and every blessing to each of them and their loved ones.
