Michio Kaku: There is a God

World-renowned US physicist Michio Kaku was quoted in an interview this week as saying that most top physicists in the world believe in God, because of how the universe is designed.

He was responding to a question on the meaning of life and God, while adding: “Ours is a universe of order, beauty, elegance, and simplicity… Believe me, everything that we call chance today won’t make sense anymore. To me, it is clear that we exist in a plan which is governed by rules that were created, shaped by a universal intelligence and not by chance,” he was quoted by WorldScience as saying.
