‘Man of God’ continues to set box office records in Greece, Cyprus

The movie industry website “screen daily” this week mentions the box office records being posted in Greece and Cyprus by the film “Man of God”, which is based on the life, works and trials of 20th century St. Nektarios of Aegina.

A news item reminds that the film, by director Yelena Popovic, has dominated the Greece and Cyprus box offices for the past month, topping the chart for four straight weeks since opening on August 26, and delivering more than 270,000 admissions during that period.
