Archdiocese of America announces Covid-19 booster shot policy for employees

The Greek Orthodox Archdiocese of America this week announced a Covid-19 booster shot policy for employees of Archdiocese.
All employees eligible for a booster are required to provide proof of the booster by Jan. 17, 2022.

According to the announcement, the Chancellor will consider requests for reasonable accommodation to be exempt from vaccination on a case-by-case basis, and only to those with medical conditions identified by the US federal government Center for Disease Control that prevent them from safely being vaccinated, or those who reject vaccination because of sincerely held religious beliefs.
