Volunteer work before the Monsoon season starts

On Sunday, June 25, 2023, following the Divine Liturgy, the common meal of love, and the group meetings, many volunteers, mainly young men, and women, worked on maintenance and repair projects of the building complex of the headquarters of the Orthodox Metropolis of Korea in Seoul. They covered the exterior surfaces of the buildings with insulating varnish and cleaned the leaves from the tiles, as well as the gutters and wells.

All together with a self-sacrificing spirit, they worked late into the night in order to complete the work before the long monsoon season began.

We sincerely thank all the volunteers and wish them good health and blessings from the Lord.
